Health Edu Web

YOUR IMMEDIATE HEALTH GUIDANCE

ReadyAid
Health Edu App

Project Overview

This web application aims to provide underserved communities with easy access to essential healthcare information and planning tools. It includes three key sections: a calendar for managing health appointments, detailed infographics for first-aid treatments, hygiene practices, and maternal & child care, along with an AI assistant for health-related queries.

ReadyAid
Health Edu App

Problem Statement

Limited Access to Healthcare Services: distance to facilities and shortage of healthcare providers.

Low health literacy: lack of information, limited education and exposure to health resources

Emergency responses challenges: emergency services may take longer to reach rural locations.

ReadyAid
Health Edu App

Problem Objectives

1

Chat Bot

Empower Users with AI: Integrate an AI assistant to offer instant, context-aware health advice and guidance based on users' queries, ensuring immediate support.

2

Calendar

Facilitate Appointment Management: Offer a calendar tool to help users manage health-related appointments, improving their ability to plan and follow through on necessary check-ups.

3

User-friendly

Support Underserved Communities: Ensure the app is easy to navigate, understandable across multiple languages, and accessible without internet, addressing the specific needs of underserved areas.

4

Infographics

Provide Health Information Access: Deliver simple and clear health education through infographics on first-aid, hygiene, and maternal & child health, accessible offline for underserved communities.

ReadyAid
Health Edu App

Project Technical Implementations

1. Front-end development: HTML, CSS, Javascript
2. Infographics: Each section (First-Aid, Hygiene, Maternal & Child Health) includes slideshows or static images.
3. Calendar integration: help users plan and track health-related appointments.
4. Botpress: provides the tools needed to create and manage the chatbot
5. NLP and Language Models: Botpress can support multiple languages, making it suitable for diverse communities.

Health Edu App

Project Results

1

Better Access to Health Information

- Users can easily find important health information.

2

Easier Appointment Management

- Users can keep track of their health appointments, leading to more check-ups.

3

Helpful AI Support

- The AI assistant gives quick answers to health questions, helping users feel more confident.

4

Improved Health Knowledge

- Users learn more about health and hygiene. The app helps improve the overall health of the community.

ReadyAid
Health Edu App

Project Conclusion

- **AI-Powered Health Assistance**

The app successfully integrates an AI assistant that provides real-time, context-aware health advice, ensuring underserved communities have immediate access to crucial health information.

- **Efficient Appointment Management**

The calendar feature helps users organize and manage their health appointments, promoting proactive healthcare planning and follow-through on essential check-ups.

- **Accessible Health Education**

Infographics on first-aid, hygiene, and maternal & child care offer clear, easy-to-understand health education, available offline for communities with limited internet access.

- **Tailored for Underserved Communities**

The app is designed to be simple, navigable, and multilingual, ensuring inclusivity. Its offline functionality ensures that even areas with poor internet connectivity can benefit from the app's resources.

Customer Testimonial

Samantha Rachel

"I've been using wardiere inc for my small business, and it's been a game-changer. The convenience and efficiency it brings to my day-to-day transactions are remarkable. The user-friendly interface made it easy for me to manage payments, and the security features put my mind at ease.
